

SHEIK NUMAN

FULL STACK DEVELOPER | DATA SCIENTIST | MACHINE LEARNING ENGINEER

Moodbidri, Mangaluru, Karnataka | +91 9008870869 | sheiknuman52@gmail.com

[linkedin.com/in/sheik-numan-a48a7240b](https://www.linkedin.com/in/sheik-numan-a48a7240b) | github.com/sheiknuman287 | sheiknuman-portfolio-website.vercel.app

PROFESSIONAL SUMMARY

BCA graduate with hands-on experience building full-stack web applications, machine learning systems, and data-driven dashboards through personal projects and structured learning. Skilled in React, Python, Flask, FastAPI, Node.js, Express, TensorFlow, Scikit-learn, Pandas, and modern web development. Focused on turning ideas into practical, deployable software.

TECHNICAL SKILLS

Frontend: React, JavaScript, HTML5, CSS3, Tailwind CSS, Vite

Backend: Python, Flask, FastAPI, Node.js, Express.js, REST APIs

ML / AI: TensorFlow, MobileNetV2, Scikit-learn, TF-IDF, Logistic Regression, Cosine Similarity

Data Science: Pandas, NumPy, Matplotlib, Plotly, Streamlit, Jupyter, Google Colab

Databases / Tools: MongoDB, MySQL, SQLite, Git, GitHub, VS Code, Postman, Render, Vercel, Netlify

SELECTED PROJECTS

Second Brain | React, FastAPI, MongoDB, JWT

AI-powered knowledge management platform with note creation, search, protected routes, AI summarization, and question answering. Built separate frontend and backend applications with REST API integration.

Zanfa Bites | React, Vite, Node.js, Express

Full-stack restaurant ordering platform with categorized menu, dynamic cart, quantity management, coupon support, checkout flow, backend APIs, and automatic PDF invoice generation.

AI Shop | Flask, Scikit-learn, SQLite, Chart.js

ML-powered e-commerce application featuring TF-IDF and cosine-similarity product recommendations, customer behavior tracking, sales analytics, and seven-day demand forecasting.

Sales & Profit Analysis Dashboard | Python, Pandas, Streamlit, Plotly

Interactive analytics dashboard for sales and profitability analysis across years, regions, and categories, with KPI metrics, trends, loss-making product analysis, and business insights.

Heart Disease Prediction | Python, Scikit-learn, Flask

End-to-end ML web application using the UCI Heart Disease dataset, StandardScaler preprocessing, classification with probability output, and downloadable PDF medical reports.

Animal Detection Web App | TensorFlow, MobileNetV2, Flask

Deep learning image-classification web app for detecting Human, Dog, Cat, and Bird classes using a MobileNetV2-based model trained in Google Colab.

Fake News Detection Chatbot | Python, Flask, Scikit-learn

Machine learning chatbot that uses TF-IDF and Logistic Regression for fake-news classification and exposes predictions through a Flask REST API.

EDUCATION

Bachelor of Computer Applications (BCA) | Mangalore University | Graduated 2026 | CGPA: 7.29/10

Alva's Degree College, Moodbidri

CERTIFICATION

The Ultimate Job Ready Data Science Course | CodeWithHarry | Completed November 2025

ADDITIONAL LEARNING

Self-directed learning through personal projects, online courses, technical documentation, and hands-on practice across Full Stack Development, Data Science, Machine Learning, and Artificial Intelligence.
